

Designed as an option for our Essentials series indoor Basketball systems, the height adjuster allows for universal adjustment at any height between 2440 and 3050 mm so players of all ages can access the ring.

- + Compatible with our FIBA certified roof and wall mounted basketball systems.
- + Suits both our glass and Fibreline backboards.
- + Manually operated as standard
- + Key operated electrical operation upgrade on request
- + Goal has direct structural mount, and is secured to frame and not to backboard alone.

Check the online video for a full demonstration of this system.
