

RMA was at the forefront of introducing aluminium Rugby Union and League goal posts in Australia in the 1990's, back when 99% of systems were traditionally steel or timber.

Over the years, we have continued to develop goal systems for safety and durability, and in the late 90's added innovations such as hinged bases for ease of installation that many of our competitors are only starting to adopt today.

All goals are supplied as sleeved systems, and have a high quality polyester powder coated finish. Systems are tapered*, and include steel internal strengthening spigots.

Goals are demountable for easy transport and storage, they are rust and rot proof.

RUG6A	Aluline 6 m (*untapered model)
RUG7A	Aluline 7.5 m
RUG9A	Aluline 9 m
RUG12A	Aluline 12 m
RUG15A	Aluline 15 m
