

- + Gusset free goal with innovative brace to allow a full height pad

- + Utilises the low mass engineered Aluline extrusion

- + Increased wall thicknesses increase rigidity and reduces post wobble.

- + Fitted end cap to protect the court and staff from sharp edges and to minimise the risk of scratches to your surface.

- + Milled net attachment meaning no risk of injury from sharp net ties.

- + Structural grade alloy and wall thickness of up to 14 mm makes the posts strength surpassing steel

- + Engineered for ease of handling and OHS

- + Optional post padding available

- + Anti-rotation mechanism integrated into the custom extrusion profile

- + Tight fitting sleeve for reduced post movement

The posts are available in standard and adjustable height configurations, and have a range of sleeves and caps to suit indoor and outdoor use.

ALULINE NETBALL POSTS
