

Play like a little pro at the International Arena on a mini backstop system!

The Junior Portable Backstop is designed to provide rugged durability for small primary schools, home, club or side court training use.

- + No specialist installation is required, and there is no need for ground inserts or penetrations.
- + Heavy duty steel construction. Base is fully padded and requires at least 115kg of ballast. (Ballast not included).
- + 1200mm x 800mm clear acrylic backboard with rounded corners.
- + Full size fixed ring mounted via direct goal design.
- + Easily adjusts from the low height of 2100mm, past the regulation heights for junior of 2600mm and senior height of 3050mm. Adjustment is aided by a unique spring assisted mechanism.
- + Unit moves on four castors and is set in place with the flip of the lever.
- + Folds down for compact storage.
- + This system is designed as a shooting station and is not recommended for main court use or dunking activities.
